

Literacy KS 3

School Comparisons

1. Use the Internet and library resources to research and compare your own school with a school in a different country.

List down the differences of school building, curriculum and timetabling and the length and time of the school day. What other differences can you find?

How might climatic and environmental differences affect the school?

Write a report of your investigation.

2. Use the Internet and library resources to research and compare your own school with a school from the past.

It may be a school and its routine from the last century or you could go further back into history.

You could interview an older person e.g. a parent or a grandparent and compare your school to the one they attended.

Use the notes you make during your investigation to write a report.
